

Dear UELMA Members,

I firmly believe, that as a media coordinator, any classroom support that can be provided should be provided. I spent half my time in the classroom, mostly during the teachers' prep periods, helping them better integrate the technology. I also believe this is the roll of the 21st Century media coordinator. We should no longer passively wait in our libraries for students and teachers to show up. We must take our resources to the classroom. Technology provides the conduit for such activity.

Charlie Roberts
Washington County School District
Technology Coordinator
